SYLLABUS FOR GREEN CHEMISTRY

UNIT-I

Introduction: Definition of Green Chemistry, Need of the green chemistry, basic principles of green chemistry

a) Green Synthesis: Evaluation of the type of the reaction 1) Rearrangements (100% atom economic) 2) Addition reaction (100% atom economic) 3) Peri cyclic react ions (no by products)

UNIT-II

b) Selection of solvent 1) Aqueous phase 2) Reactions in Ionic liquids 3) Solid support synthesis

UNIT-III

c) Green catalysts 1) Phase transfer catalysts (P.T.C.) 2) Bio-catalysts.
Microwave & ultra sound assisted green synthesis.

1) Aldol Condensation 2) cannizzaro reaction 3) Diels-Alder reactions
4) Strecker synthesis 5) Williamson's synthesis 6) Dieckmann Condensation

Certificate Course OnPROGRAMMING IN C

Course Objectives:

- Learn how to solve common types of computing problems.
- Learn data types and control structures of C
- Learn to map problems to programming features of C.
- Learn to write good portable C programs.

UNIT I

Introduction to Algorithms and Programming Languages: Algorithm – Key features ofAlgorithms – Some more Algorithms – Flow Charts – Pseudo code – Programming Languages – Generation of Programming Languages – Structured Programming Language-Design and Implementation of Correct, Efficient and Maintainable Programs.

Introduction to C: Introduction – Structure of C Program – Writing the first C Program – File used in C Program – Compiling and Executing C Programs – Using Comments – Keywords – Identifiers – Basic Data Types in C – Variables – Constants – I/O Statements in C- Operators in C- Programming Examples – Type Conversion and Type Casting

UNIT II

Decision Control and Looping Statements: Introduction to Decision Control Statements –Conditional Branching Statements – Iterative Statements – Nested Loops – Break and Continue Statement – Goto Statement

Functions: Introduction – using functions – Function declaration/ prototype – Functiondefinition – function call – return statement – Passing parameters – Scope of variables – Storage Classes – Recursive functions – Type of recursion – Towers of Hanoi – Recursion vs Iteration

UNIT III

Arrays: Introduction – Declaration of Arrays – Accessing elements of the Array – StoringValues in Array – Calculating the length of the Array – Operations on Array – one dimensional array for inter-function communication – Two dimensional Arrays – Operations on Two Dimensional Arrays - Two Dimensional Arrays for inter-function communication – Multidimensional Arrays – Sparse Matrices

Strings: Introduction –Suppressive Input – String Taxonomy – String Operations – Miscellaneous String and Character functions

SYLLABUS FOR GREEN CHEMISTRY

UNIT-I

Introduction: Definition of Green Chemistry, Need of the green chemistry, basic principles of green chemistry

a) Green Synthesis: Evaluation of the type of the reaction 1) Rearrangements (100% atom economic) 2) Addition reaction (100% atom economic) 3) Peri cyclic react ions (no by products)

UNIT-II

b) Selection of solvent 1) Aqueous phase 2) Reactions in Ionic liquids 3) Solid support synthesis

UNIT-III

c) Green catalysts 1) Phase transfer catalysts (P.T.C.) 2) Bio-catalysts.
Microwave & ultra sound assisted green synthesis.

1) Aldol Condensation 2) cannizzaro reaction 3) Diels-Alder reactions

4) Strecker synthesis 5) Williamson's synthesis 6) Dieckmann Condensation

Certificate Course On PROGRAMMING IN C

Course Objectives:

- Learn how to solve common types of computing problems.
- Learn data types and control structures of C
- Learn to map problems to programming features of C.
- Learn to write good portable C programs.

UNIT I

Introduction to Algorithms and Programming Languages: Algorithm – Key features of Algorithms – Some more Algorithms – Flow Charts – Pseudo code – Programming Languages – Generation of Programming Languages – Structured Programming Language-Design and Implementation of Correct, Efficient and Maintainable Programs.

Introduction to C: Introduction – Structure of C Program – Writing the first C Program – File used in C Program – Compiling and Executing C Programs – Using Comments – Keywords – Identifiers – Basic Data Types in C – Variables – Constants – I/O Statements in C- Operators in C- Programming Examples – Type Conversion and Type Casting

UNIT II

Decision Control and Looping Statements: Introduction to Decision Control Statements – Conditional Branching Statements – Iterative Statements – Nested Loops – Break and Continue Statement – Goto Statement

Functions: Introduction – using functions – Function declaration/ prototype – Function definition – function call – return statement – Passing parameters – Scope of variables – Storage Classes – Recursive functions – Type of recursion – Towers of Hanoi – Recursion vs Iteration

UNIT III

Arrays: Introduction – Declaration of Arrays – Accessing elements of the Array – Storing Values in Array – Calculating the length of the Array – Operations on Array – one dimensional array for inter-function communication – Two dimensional Arrays – Operations on Two Dimensional Arrays - Two Dimensional Arrays for inter-function communication – Multidimensional Arrays – Sparse Matrices

Strings: Introduction –Suppressive Input – String Taxonomy – String Operations – Miscellaneous String and Character functions
